

Vidyo for Vocational Education

What are Your Needs?

- Are your students engaged in the vocational education classes you offer?
- Are you able to connect students with experts from the workplace for learning and mentoring?
- Do you offer options for high school students to advance through dual enrollment classes at the community or technical college levels?
- Are you able to provide teachers and instructors with comprehensive professional and leadership development opportunities?

Workforce readiness is a national priority and a strong program in vocational education can help more students transition smoothly into the workforce. Vocational education aims to develop the academic, vocational, technical skills of the student while providing an understanding of “all aspects” of focused industries.

At Issue

The need to provide students with the training and academic background necessary to enter the workforce upon graduation

The need for enhanced curriculum that keeps students engaged and excited to learn

The need to connect secondary with post-secondary schools and give students the best possible vocational education

The need to provide teachers with professional development experiences to stay abreast with the changing workplace

The Vidyo Solution

Students can connect via Vidyo with professionals from the workplace for career-relevant content in the classroom and the benefits of being mentored in practical real-world application of their studies.

Schools can partner with innovative content providers and use Vidyo to bring vocational education into the classroom. Virtual fieldtrips can expose students to first-hand experiences in their fields of interest. They can develop teamwork and learn to use collaborative tools as they create relevant content to showcase their knowledge and share with peers anywhere in the world.

Vidyo makes it easier for students to access and participate in dual enrollment classes and pursue distance learning programs at the higher education level. Today's students are quite comfortable with video-based experiences, and the high quality delivered by Vidyo supports natural interaction and content sharing over a simple Internet connection.

Experienced teachers can share best practices, develop mentoring networks and create exciting team teaching exercises. Vidyo can connect teachers from home or classroom desktop or mobile devices and a simple internet connection, with expensive and time-consuming travel requirements.
