Enterprises have turned to video conferencing technology to enhance worker collaboration and efficiency. Many have made significant investments in video and voice conferencing systems but want to move to more modern platforms for higher quality collaboration. Enterprises demand high quality video conferencing technology that is flexible that works with existing legacy systems.

**Solution Overview**

Enterprises are rapidly increasing the use of video conferencing technology for collaboration. This includes the use of newer technologies for desktop and mobile based video endpoints providing users with the flexibility to conveniently collaborate from anywhere. The VidyoConferencing™ platform delivers stunning video quality with robust reliability that enterprises demand. With the VidyoGateway™ enterprises can take full advantage of the VidyoConferencing platform while still leveraging investments made in legacy technology.

The VidyoGateway brings interoperability from third party voice and video systems into the VidyoConferencing platform. Meeting participants joining from third party H.323 and SIP based systems get full bidirectional audio and video capability along with advanced capabilities such as content sharing, far end camera control, encryption, DTMF controls, and more.

For IT managers, the VidyoGateway is easily deployed either as a turnkey network appliance or virtualized software package. The VidyoGateway provides numerous IT friendly features including clustering for increased capacity and redundancy, integration into third party call control, firewall/NAT traversal, and many more.

**Exceptional User Experience**

- Connect and control third party H.323 and SIP endpoints and cameras
- Share content between H.323, SIP and Vidyo endpoints
- Manage call the in-call experience through DTMF commands
- Customizable Interactive Voice Response (IVR), participant join/leave and recording indicators
- Receive the best call quality possible with automatic bit rate and resolution matching
- Easily connect to conferences with built in firewall and NAT traversal support

**IT Benefits**

- Automatically sizes capacity to allocated VM resources
- Clustering and high availability deployment options enhance capacity and resiliency
- Simplify administration, configuration and maintenance with centralized web-based interface
- Leverage built-in security management: SSL certificates, private key management, and HTTPS all FIPS 140-2 compliant

**VidyoGateway delivers robust interoperability for third party voice and video conferencing systems**

**Quality matters.**
# Specifications

## VidyoGateway™ XL vs VidyoGateway™ VE

## Content Sharing

- VidyoGateway™ XL: up to 1080p30
- VidyoGateway™ VE: up to 1080p30

## Protocols and Standards

- **Video**: H.264 SVC (UCIF mode 2s), H.264 AVC, H.263
- **Audio**: G.711, G.722, Opus
- **Encryption**: SRTP, H.235 AES, and TLS
- **Far-end Camera Control (FECC)**: H.224
- **Data Sharing**: H.239, BFCP
- **Signaling**: H.323 and SIP
- **Dialing**: E.164, URI (H.323 Annex Q and SIP URI)

## Power Supply

- **Input**: 100-240v ~, 3.5A, 50-60Hz
- **Output**: 2x 550W Redundant (auto-ranging, Platinum efficiency)
- **Consumption**: 112W (idle), 210W (full load)
- **Dissipation**: 245 BTU (idle), 845 BTU (full load)

## Physical

- **Dimensions (HxWxD) without ear and bezel:**
  - Height: 1.69" (42.8 mm)
  - Width: 17.09" (434.0 mm)
  - Depth: 25.28" (642.3.1 mm)
- **Weight**: 43.87 lbs (19.9 kg)
- **Form Factor**: 1U Rack mount (ReadyRails™ sliding rails included)
- **Host Server Requirements**
  - Intel-based servers with a minimum Xeon 56xx Series at 2.4 GHz or faster, supporting Intel Westmere (or newer) architecture, with AES-NI and hyper-threading enabled; 1 Gbps NIC

## Network

- **2x RJ45 LAN ports**: 100BASE-TX, and 1000BASE-T

## Environment

- **Operating Temperature Range**: 10° to 35°C (50° to 95°F)
- **Non-Operating Temperature Range**: -40° to 70°C (-40° to 158°F)
- **Operating Humidity Range**: 8% to 90% non-condensing
- **Non-Operating Humidity Range**: 5% to 95% non-condensing

## Regulatory

- **EMC**: Electromagnetic Emissions: FCC Class A, EN 55022 Class A, EN 61000-3-2/3-3, CISPR 22 Class A
- **Electromagnetic Immunity**: EN 55024/ CISPR 24, (EN 61000-4-2, EN 61000-4-3, EN 61000-4-4, EN 61000-4-5, EN 61000-4-6, EN 61000-4-8, EN 61000-4-11)
