

VidyoProducer™

Record and Stream Your Important Video Conferences

Business Challenge

Many organizations using Vidyo Conferencing for team collaboration also want to use video for training, all-hands meetings, compliance, corporate communications and more.

Easily record and stream from Vidyo endpoints with **VidyoProducer**.

Solution Overview

VidyoProducer is a software solution that makes it easy for end-users to record and stream from Vidyo endpoints, with an open integration into third-party video content management systems (VCM) and content delivery networks (CDN). Unlike competitive solutions, VidyoProducer takes a vendor-agnostic approach to integration, giving IT organizations the flexibility and choice to leverage existing investments in VCM and CDN, for a best-of-breed solution. VidyoProducer uses well-defined protocols to provide out-of-the-box integration with industry-leading content management and content delivery solutions.

Easy Recording

- Initiate and control recording from Vidyo endpoint or VidyoPortal meeting control
- Recording layouts options include video/audio with or without content sharing, or audio with content sharing
- Visual and audible “Recording” indication provided to all participants while recording is in progress
- Download and edit .mp4 recordings with standard video editing tools

Flexible API and Customization

- Easy integration with thirdparty Content Management Systems (CMS) and Content Delivery Networks (CDN)
- User interface branding and skinning

Easy to Manage

- Administration, configuration and maintenance via browser-based VidyoPortal
- Recording profiles for simplified setup and consistent user experience
- Supports single and multi-tenant environments

Easy to Deploy and Scale

- Host in public or private IP networks
- Secure media and signaling encryption option with FIPS support
- Automatically sizes capacity to allocated VM Resources
- Clustering and high availability deployment options enhance capacity and resiliency

Specifications

VidyoProducer™

| Recording Capacity | VidyoProducer Capacity (concurrent recordings) | VM Configuration | Resource Reservation | |
|--------------------|---|------------------|----------------------|----------|
| | | RAM [GB] | CPU [GHz] | RAM [GB] |
| | 1 HD (720p) | 2 | 2 | 2 |
| | 3 HD (720p) | 2 | 4.4 | 2 |
| | 5 HD (720p) | 6 | 8.8 | 6 |
| | 8 HD (720p) | 8 | 12 | 6 |
| | 12 HD (720p) | 12 | 20 | 12 |
| | 16 HD (720p) | 15 | 25 | 15 |
| | 20 HD (720p) | 15 | 30 | 20 |

| | |
|-------------------------------|--|
| Cluster Support | Yes, for increased recording capacity and redundancy |
| Export Format | .mp4, H.264, AAC |
| Media Export Protocols | HTTP(S), (S)FTP, SMBFS |
| Security | HTTPS, SSL, TLS, FIPS 140-2, SFTP |
| Deployment Options | VMWare Virtual Machine only |
| Management | CLI, Web (HTTPS) GUI, SNMP |
