

# Vidyo for Shared Instructors and Virtual Classes

## What are Your Needs?

- Do you have students who would benefit from working towards a four-year degree while enrolled in community college?
- Are your students looking to access classes in a virtual environment, from home or the workplace?
- Do your students have degree requirements that call for taking classes at more than one institution?
- Would your teaching staff and students benefit from the ability to collaborate with other academic institutions?

The needs of today's college and university students are changing. Many students are working part-time to finance their education. Others are adults returning to school for an advanced degree with career growth in mind. More often than not, these students need access to classes offered by multiple institutions and outside of the traditional school day. Modern video conferencing technology goes a long way to meeting these needs by creating virtual learning environments.

### At Issue

### The Vidyo Solution

**The need to improve access to classes for all students**

The Vidyo platform lets students attend class remotely from everyday mobile and desktop devices. An internet connection is all that's needed to participate in classroom sessions.

**The need to connect community college students with instructors/researchers at four-year institutions**

Community college students can often pursue advanced level coursework early by connecting to four-year institutions. By engaging early, these students will have a smoother transition into their final two years of study.

**The need to connect the workforce with opportunities for continuing education**

Vidyo allows adult students to connect to class from home or the office in order to continue their education and advance their careers. With Vidyo, they can participate in classes using everyday mobile or desktop devices and a simple internet connection.

**The need to provide shared instruction among schools in order to meet the needs of students and their instructors**

Colleges and universities can partner to provide more classes at a variety of times, accessible through a variety of media and platforms in order to meet the needs of today's and tomorrow's students. Vidyo is easily integrated with mobile education carts and electronic whiteboards to support virtual learning environments.

**The need to support students who might otherwise fall behind and abandon their studies**

Some students may need extra encouragement to stay in school and finish a degree program. Vidyo can connect students to current workers in their chosen fields who can offer mentoring support to help ensure that students stay on track to succeed. Video conferencing is familiar and comfortable and eliminates the time and expense of travel.
