

Vidyo®

Hybrid Cloud Expansion

Burst Your On-Premises
Vidyo Capacity in the Cloud

Use Cases

- **Internal employee communication tool** – Quickly increase capacity if employees have a sudden need to work remotely due to unforeseen circumstances
- **Telehealth surge** – Continue seeing patients without disruption if medical offices need to limit capacity
- **Virtual banking** – In the event that banks need to close or limit in-person visits, keep all existing appointments by moving tellers and brokers to a virtual platform
- **Hybrid gateway expansion** – A functional expansion that gives your company the option to dial out to a 3rd party, such as a Stratus interpreter or a patient's family member, during a video call

Benefits

- **Priority installation** – Once customers have placed their order; they can begin using their additional capacity within 5 business days
- **Flexible plans** – If customers need to leverage additional capacity due to unforeseen circumstances (ex: COVID-19), they have the option to purchase a short-term, 3-month plan and can re-evaluate their needs as they reach their expiration date
- **All-in-one package** – Each cloud expansion plan has everything customers need to be fully operational including installation, maintenance, and standard cloud service and support

Business Challenge

With the recent impact of a global pandemic, your business most likely had to reimagine the way your employees complete day-to-day work. While the world may not experience another pandemic any time soon, situations will continue to arise that will make video meetings a necessity.

It's imperative to have a plan in place to quickly and affordably increase the number of users that can work remotely without the delay of expanding and upgrading your data center or infrastructure. Finding the best option for your company can be challenging, but with the help of Vidyo's professional services experts, you'll be prepared for any situation.

Vidyo Solution

The Hybrid Cloud Expansion deployment model is a SaaS solution for on-premises Vidyo customers who are experiencing a surge in demand and need a fast and flexible way to burst their capacity.

With this deployment model, you can leverage Vidyo's cloud environment quickly and avoid any disruption in your company's day-to-day operations.

Your organization has the option to purchase a short-term plan for an unexpected event or an annual plan for long-term backup coverage. Each plan includes installation, maintenance, and standard cloud service and support.

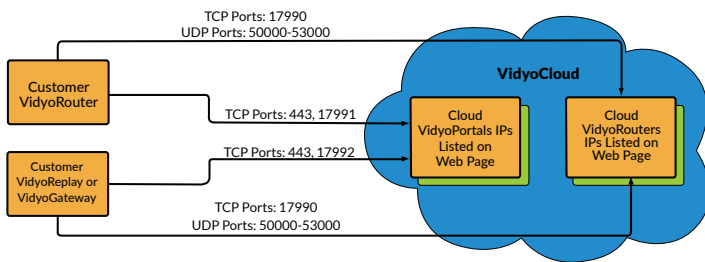

Anticipated Results

With Vidyo's Hybrid Cloud Expansion plans, you can rest easy knowing flexible coverage is available to support your company in the event of an unexpected need for increased video capacity.

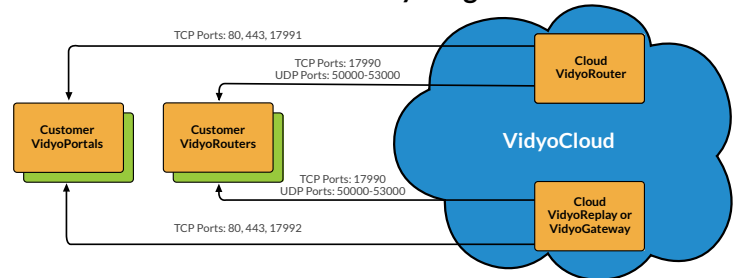

Whether you need to quickly deploy a plan at the time of the surge, or you opt for annual coverage, Vidyo has your organization covered.
