

Vidyo Private Cloud Offerings

Benefit from Immediate Cost Savings by Migrating to Private Cloud

For long-time Vidyo customers who have on-premises deployments, migrating to private cloud provides all the benefits of a cloud-delivered managed service, while maintaining the ultimate control of your Vidyo deployment.

Vidyo's private cloud is not only the most cost-effective cloud migration option available, but it also provides unmatched scalability, resiliency, and flexibility, all powered by Google Cloud Platform (GCP).

Financial Benefits

- ✓ **Leverage your Vidyo investment**
Save money and simply migrate your existing VidyoLines and infrastructure licenses to the cloud
- ✓ **Save effort on management**
Eliminate the headaches created from the management of infrastructure and network/solution design issues
- ✓ **Guarantee more uptime**
Deliver at least 99.95% uptime to your users
- ✓ **Eliminate equipment maintenance**
As hardware ages, you are not burdened with the cost of technology refresh in your data center.
- ✓ **Free up IT time and resources**
Focus on more strategic projects and initiatives

Technology Benefits

- ✓ **Distributed architecture provides fail-over**
Leverage a cloud platform with segregated regions, zones, and data centers, so infrastructure is decentralized, enabling easier disaster recovery
- ✓ **Encryption-at-rest**
GCP encrypts data stored at rest by default, with no additional action required from you, which provides a higher level of security than most on-premises deployments
- ✓ **Keep your Super Admin controls**
Enjoy the maximum level of control over your Vidyo deployment, while still benefitting from cloud architecture
- ✓ **Fast, flexible, and silent upgrade cycles**
With a recommended upgrade cycle of at least 2x per year, you will always have the latest features
- ✓ **Grow easily**
Private cloud offers the scalability to add more capacity quickly, without having to upgrade hardware.

Enhance your private cloud deployment with optional professional and developer ops services:

Branding & white labeling

Custom domain

Certificate management

Proactive monitoring

Migration of video recordings to cloud

Business continuity plans

Technical training

And more..
